

# 79 secteurs à enjeux potentiels

## "mares" = 518 mares

Sources et réalisation : PRAM Grand Est (mares potentielles connues en 2018), PETR du Pays de la Déodatie et de Remiremont et de ses vallées, mars 2022.

### Secteurs prioritaires

- priorité I : classe 2 pour densité (entre 4 et 8 mares connectées) et classe 1 pour connectivité (< 44 ha connectés)
- priorité II : classe 2 pour densité (entre 4 et 8 mares connectées) et classe 3 ou 2 pour connectivité (> 44 ha connectés) OU classe 3 pour densité (> 8 mares connectées) et classe 1 pour connectivité (< 44 ha connectés)
- priorité III : classe 3 pour la densité (> 8 mares connectées) et classe 2 ou 3 pour la connectivité (> 44 ha connectés)

# Diagnostic de la Trame Verte et Bleue - sous-trame "mares"

*sur le territoire des 2 PETR du Pays de la Déodatie  
et de Remiremont et de ses vallées*

## Légende

- mares potentielles connues 2022

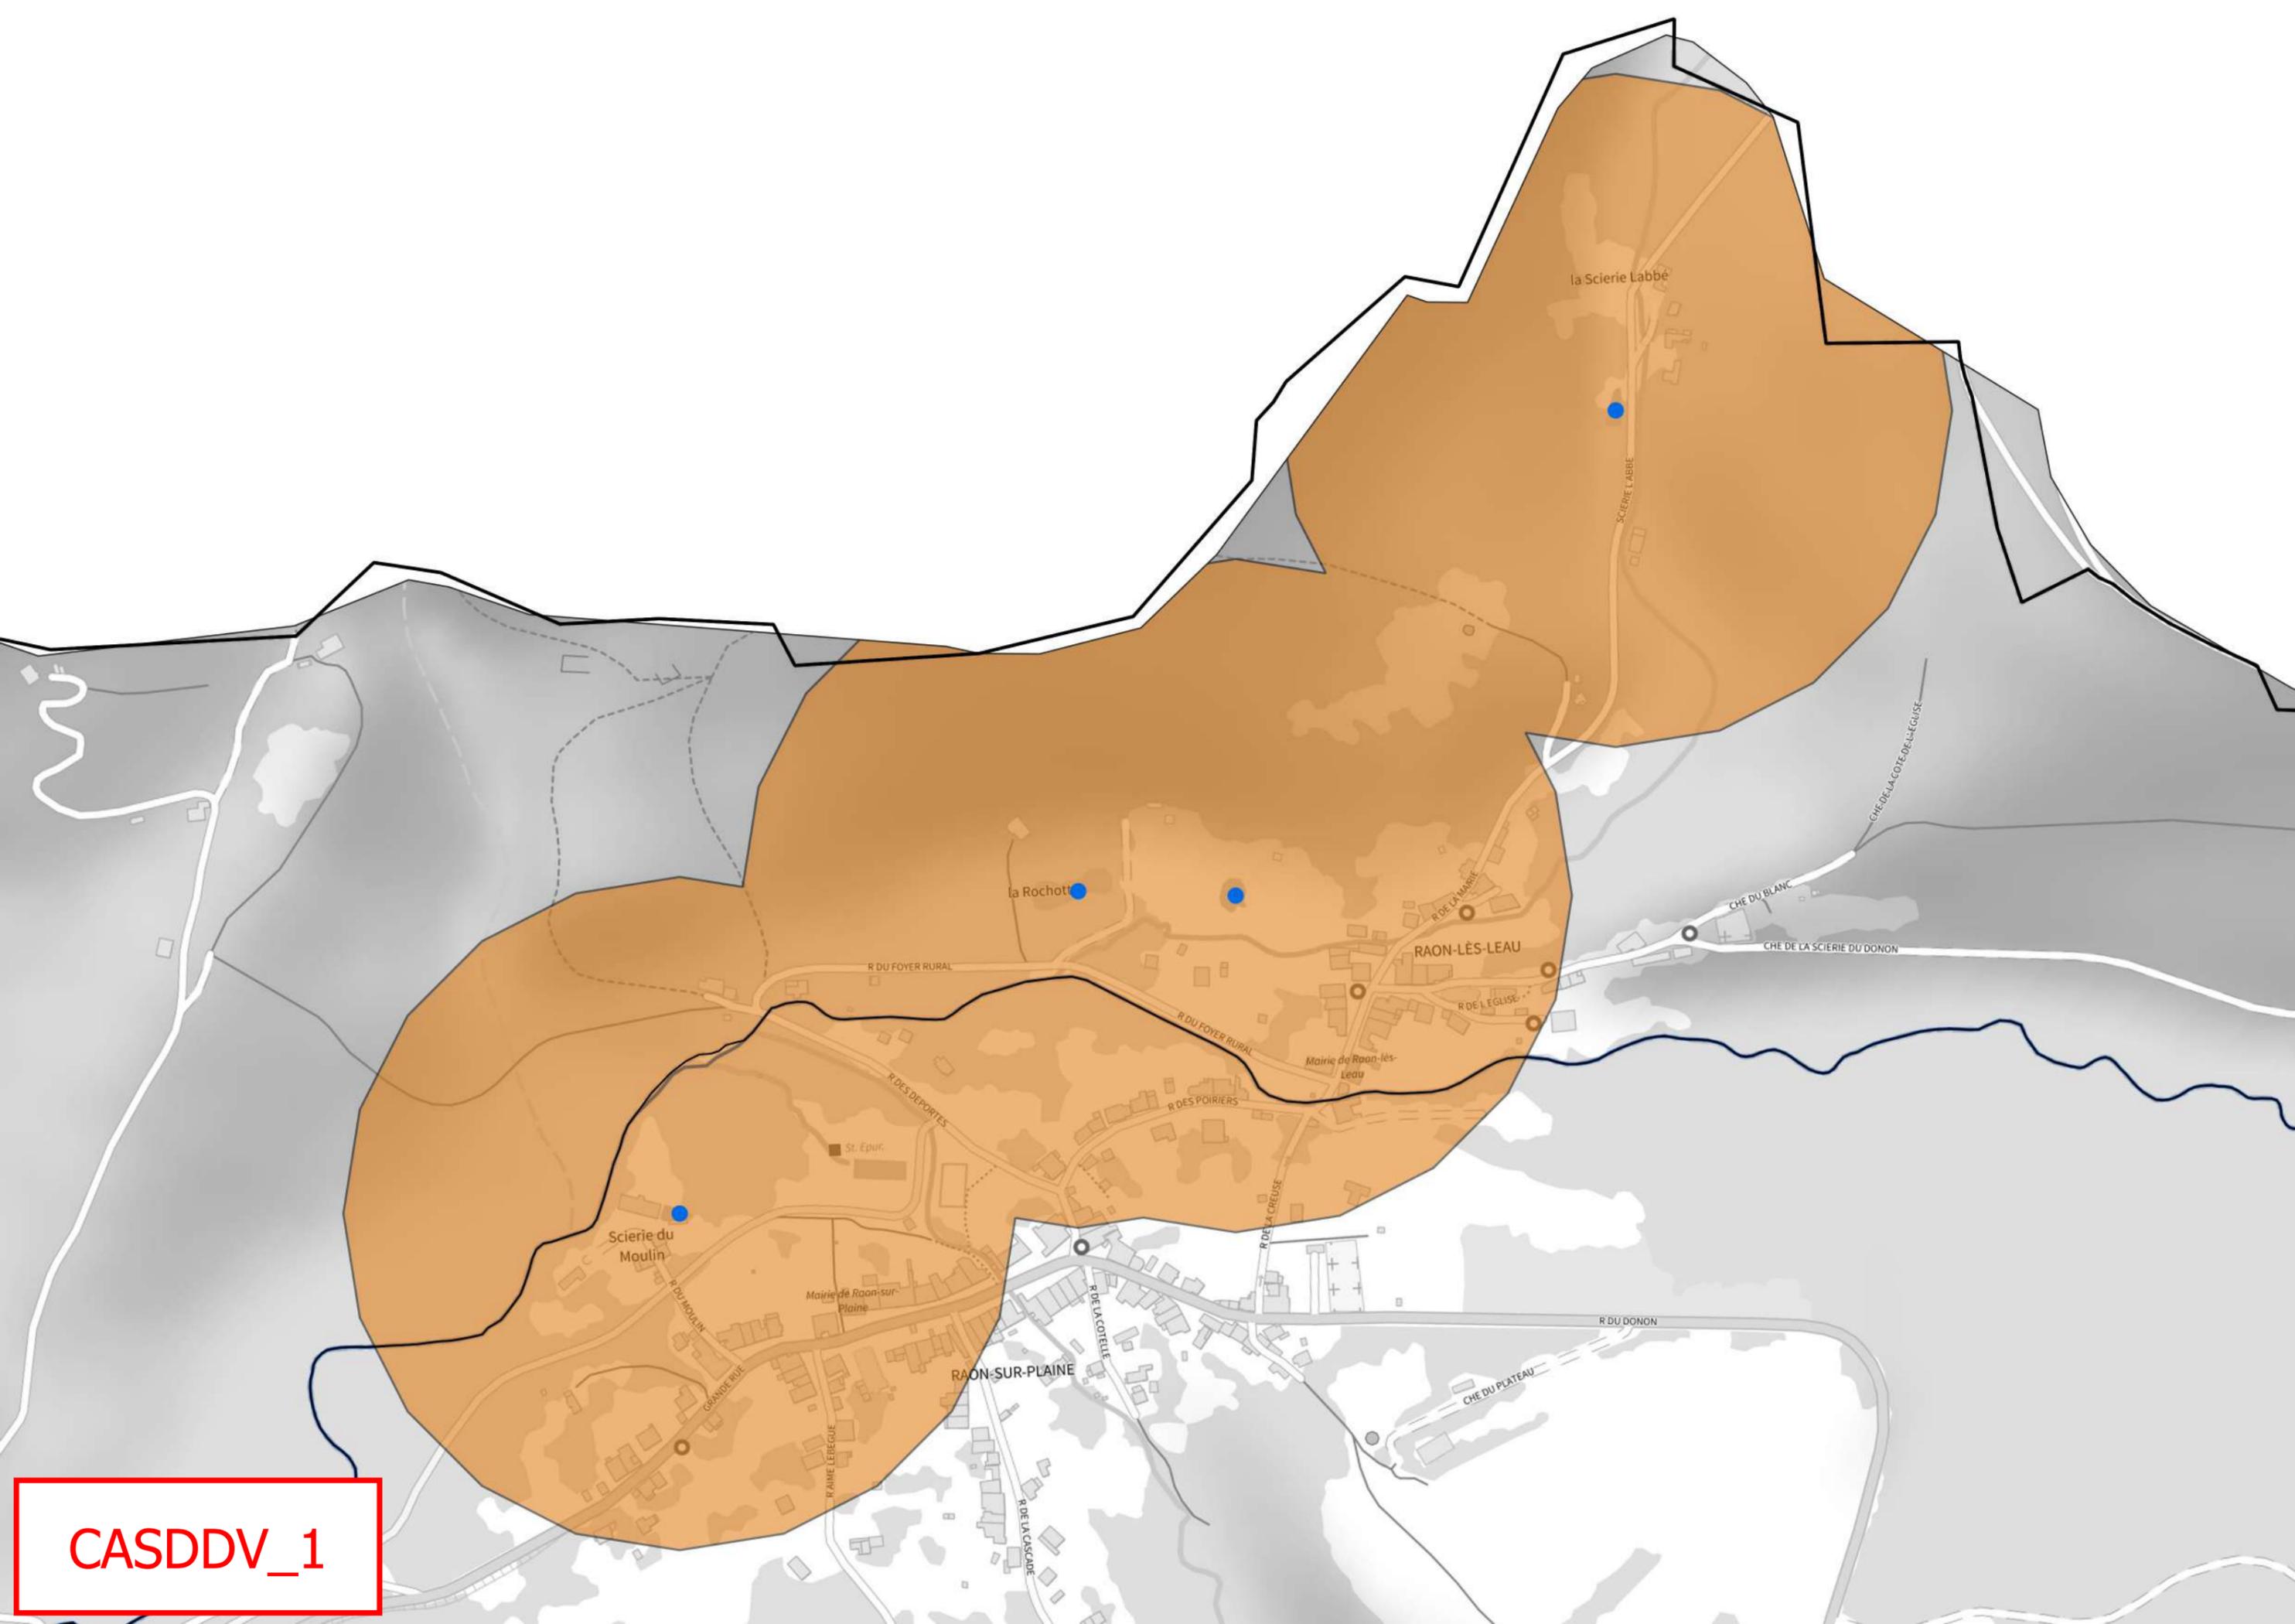

### Secteurs prioritaires

-  priorite I : clas 2 pour densite et clas 1 pour connectivite
-  priorite II : classe 2 pour densite et classe 3 ou 2 pour connectivite OU classe 3 pour densite et classe 1 pour connectivite
-  priorité III : classe 3 pour la densité (> 8 mares connectées) et classe 2 ou 3 pour la connectivité (> 44 ha connectés)
-  limites communales
-  courd d'eau principaux

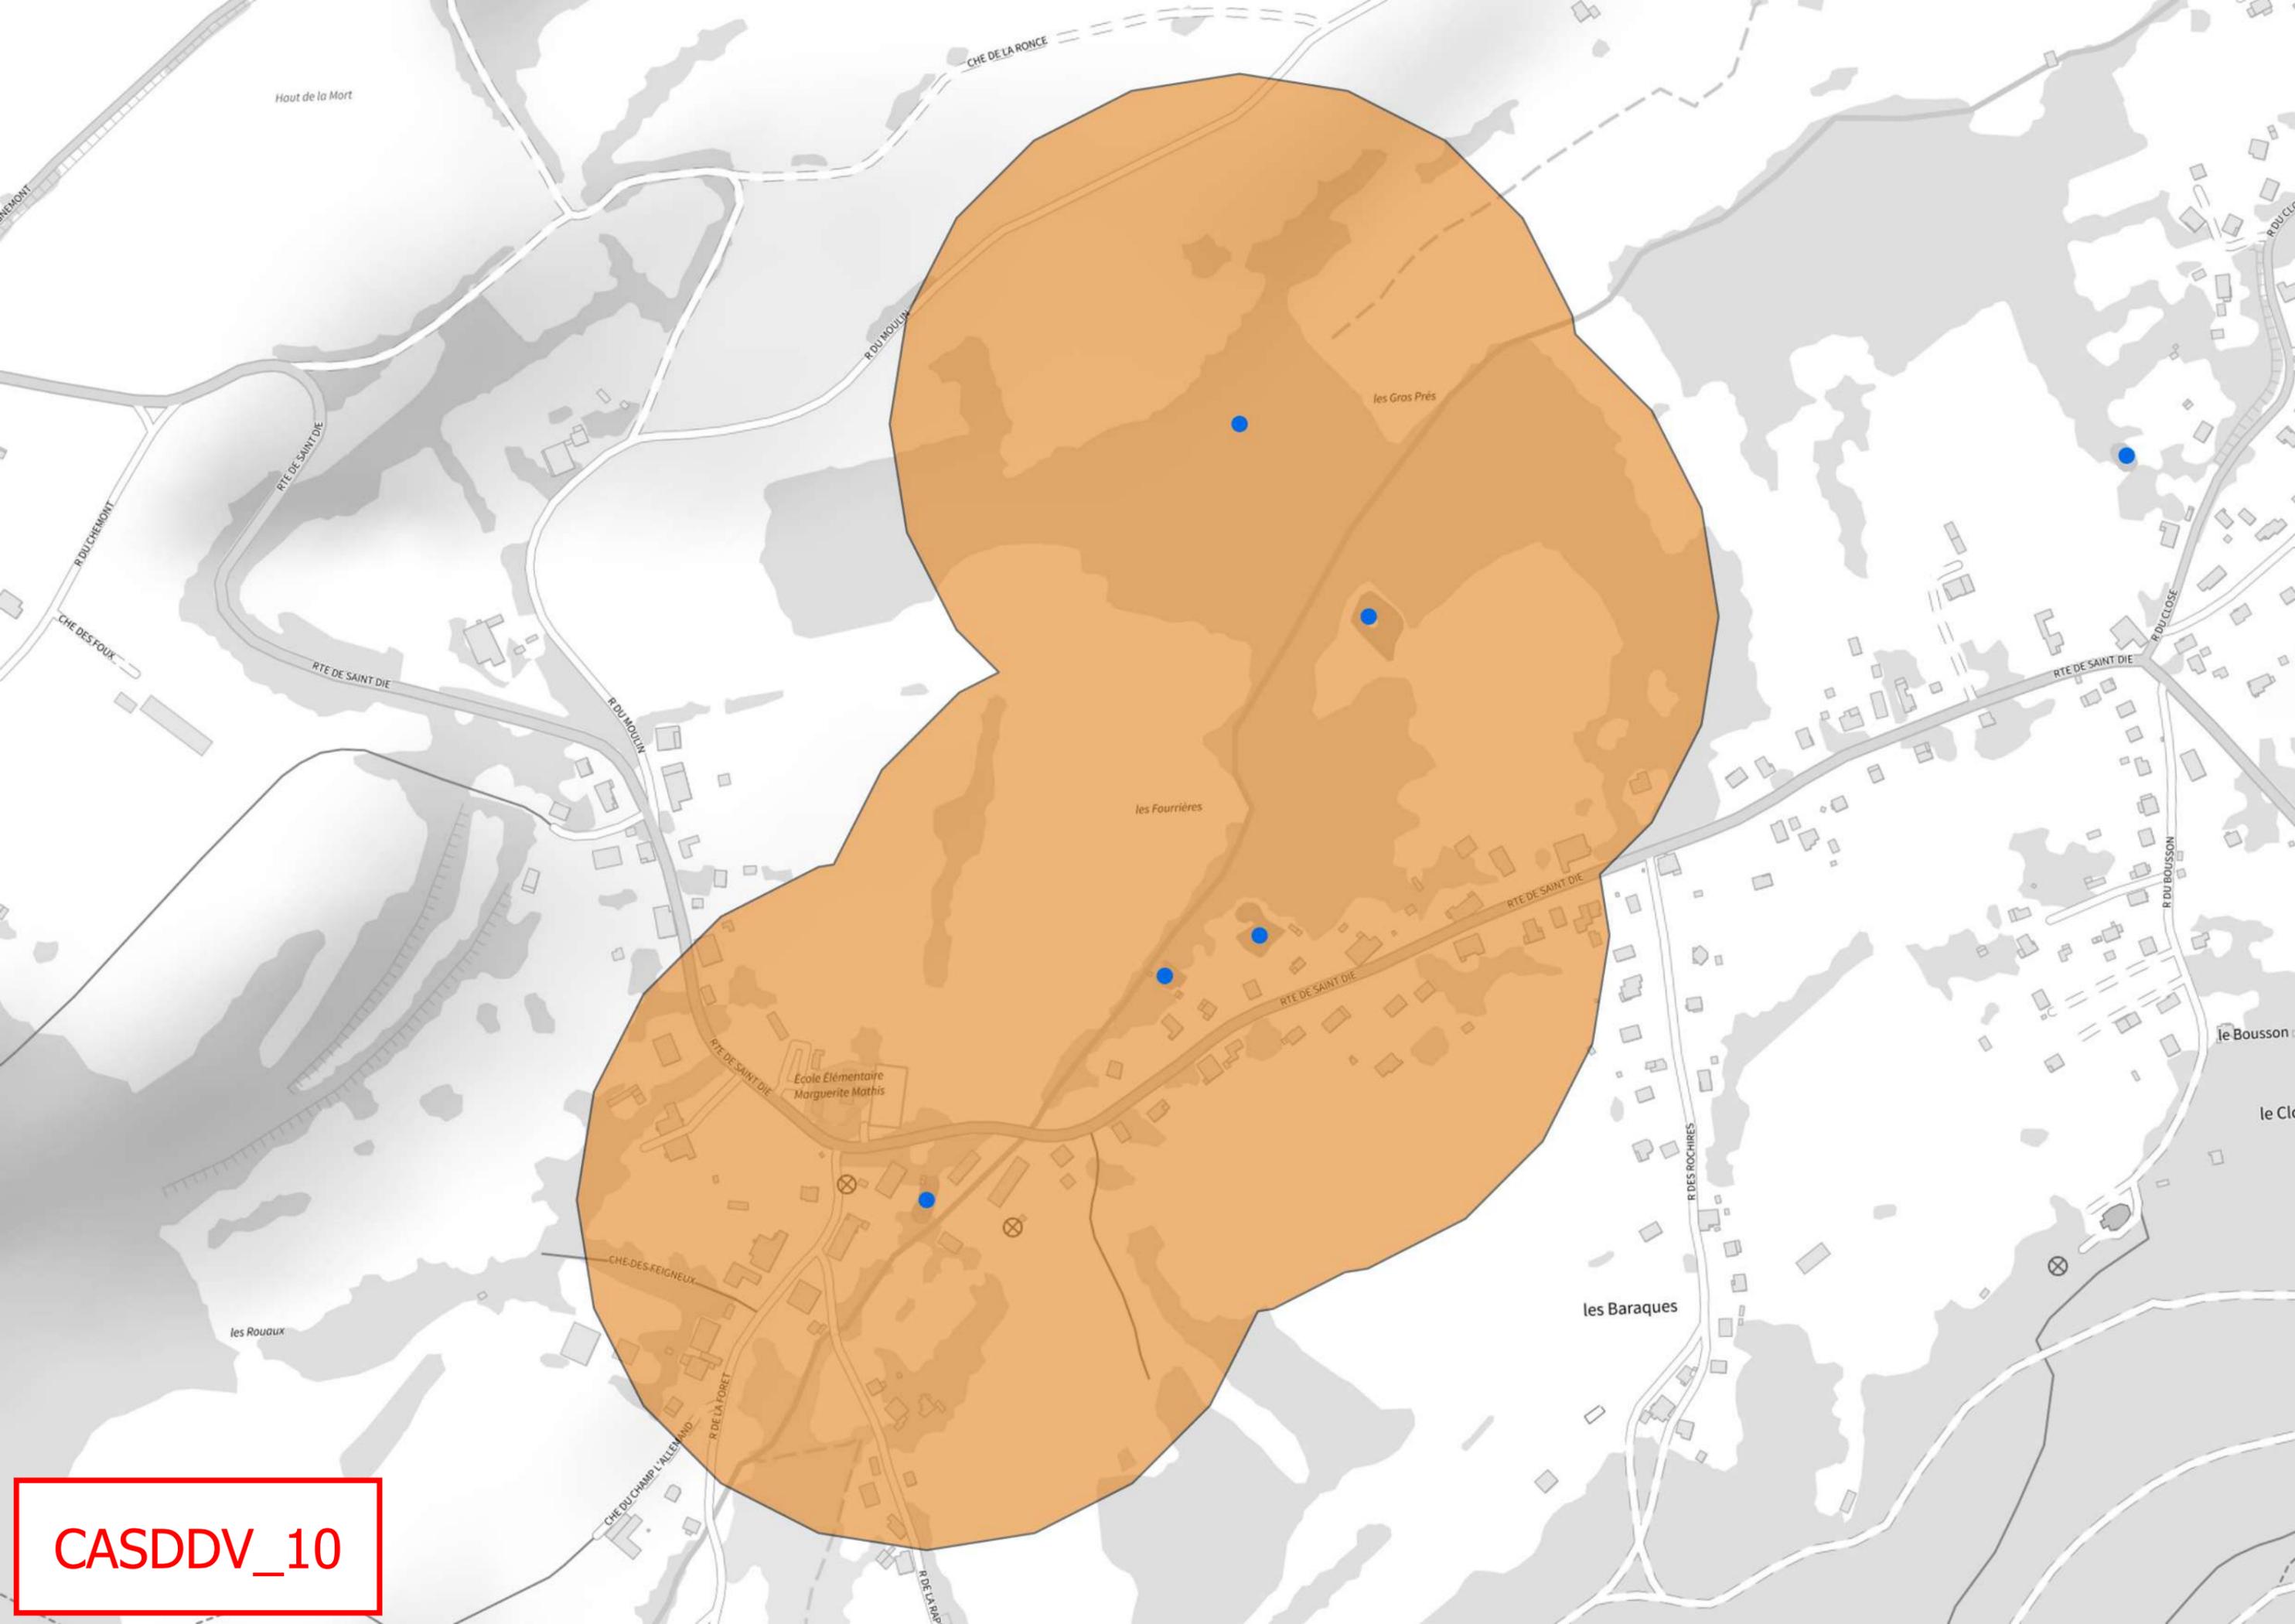

Sources et réalisation : PETR du Pays de la Déodatie et du Pays  
de Remiremont et ses vallées, mars 2022.
